

## Activity Checklist

Get ready

Press Make a list to make a new list.

Try this code

Empty the list when you start.

```
when flag clicked  
delete (all v) of [notes v]
```

Every time something happens, add it to the list.

```
when this sprite clicked  
play note (pitch) for (0.5) beats  
add (pitch) to [notes v]
```

If you want to record several things, use one list for each.

```
when [space v] key pressed  
move (10) steps  
add (x position) to [xs v]  
add (y position) to [ys v]
```

See the “Play back a sequence” card for how to replay what you’ve recorded.
