

Scratch Card - Piano

Activity Checklist

Draw a piano by creating black and white rectangles.

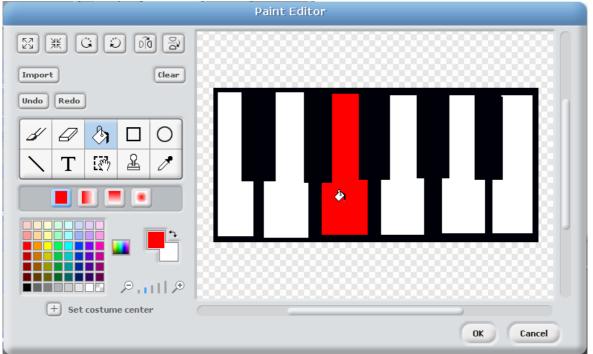

Now create a script which plays a note when the "a" key is pressed.

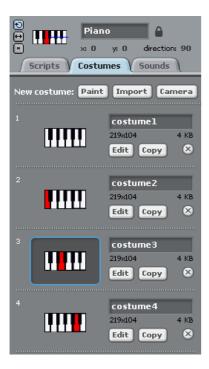

Create two more notes when you press "s" and "d" on the keyboard.

Copy the costume 3 times. Fill in a different key on each one.

Make each note switch to a different costume and then switch back to costume1.

```
when I receive piano-1 v

switch costume to costume2 v
play note 60 v for 0.5 beats
switch costume to costume1 v

when I receive piano-2 v

switch costume to costume3 v
play note 64 v for 0.5 beats
switch costume to costume1 v

when I receive piano-3 v

switch costume to costume4 v
play note 67 v for 0.5 beats
switch costume to costume4 v
costume to costume1 v
```

Challenge: Create a way to change the instrument.

```
when up-arrow v key pressed
set instrument to pick random 1 to 99
```
